

BIO

Radio Compass combines riot grrl yip and yelp with the arch tunefulness of peak new wave songwriters, wrapped up and delivered by a loud band that's equal parts bashing grunge and lockstep post-punk. The songs alternately plead, scold, and simmer. "No shortage of satisfying riffs and hooks that will invade your brain for days to come (in the best way)..." says Harmonix.

The band has been performing together since 2016, playing festivals such as *Pouzza 9, 10 & 11, Once, A Fest, Boston Music Festival, Salem Arts Festival* multiple fundraisers, many rock venues, have had songs featured in Harmonix products and shared the stage with the likes of Speedy Ortiz, Piebald, Weakened Friends and more. Recent releases include a music video single for "Stay High" which Worcester Magazine describes as, "utterly addicting, and terribly easy to lose one's self in" and their most recent single, "California", released October 13th, 2023 as part of a new EP out in 2024. "California" which MusicBox Pete describes as "enthraling and mind-blowing...A stunning and drop-dead gorgeous escapist tune" and Rock and Roll Fables describes as "infectious" and "a magical mix of genres", gives us a glimpse of the dreamy pop post-punk possibilities the new EP may reveal which is a sonic departure from the band's pandemic project 11 song LP, *Aloha*, released last year through Sound Investment Records (U.S.) Gunner Records (Germany). Prior works include 2016's bedroom pop LP *Papercuts* and 2018's PostPunk EP *...for a girl*. New music and a new video for recent single *California* underway for spring 2024! Stay tuned!
